

Date - December 31, 2002
 Title - Audio/Video Program Display
 No - 004

ENVIRONMENT	Golf course, shopping, mall, department store, airport, transportation center
MINICOM PRODUCT	Audio Video Display System (AVDS)
CHALLENGE	A golf course operator wants to display video programming from a 1 of 2 video servers to 12 locations in a golf lodge.
MINICOM SOLUTION	The AVDS broadcaster with 3 line splitter can display a single video and audio source to all the remote locations using CAT5 cable. The AVDS Remote unit receives the signal from the CAT5 cable and transforms it to standard VGA and audio outputs. The Smart 2 KVM switch allows the operator to switch between 2 video sources
BENEFITS	The video and audio are transmitted over a single CAT5 cable. The AVDS Remote units do not require power supplies. The displays can be 100m/360t. from the video source.
