 Title - Post Office Messaging System  
 No - 013

<b>ENVIRONMENT</b>	Public buildings; Municipal offices; Post offices; Banks; Supermarkets; etc.
<b>MINICOM PRODUCT</b>	Video Display System (VDS)
<b>CHALLENGE</b>	A city post office department wants to display messages about available services to customers waiting in line in local branches. The LCD monitors are located in the public area and the content server is located in a back office closet.
<b>MINICOM SOLUTION</b>	Use the VDS system to extend the video and from the server to multiple LCD monitors using CAT5 cable.
<b>BENEFITS</b>	Broadcast a single video source to multiple monitors. The signal source can be 360ft. from the displays. Only 1 CAT5 cable is needed to extend the video the server to each display.
